International Surgery Medical Director's Attestation

The Surgical Medical Director must attest that the facility meets all local, provincial, and federal regulations, since such governmental regulations may supersede QUAD A Standards. Please note, however, that the stricter regulation always applies.

Please complete and sign the following Surgical Medical Director's Attestation document and return it to the QUAD A office.

Medical Director's Attestation

As Director of the (name of facility) _____, located at _____, I attest that this facility meets all applicable local, state/province, and national zoning and construction codes and regulations as mandated. I further acknowledge that wherever governmental regulations or codes supersede QUAD A Standards, the stricter rule is applicable, whether it is the local, state/province, national regulation or code or QUAD A Standard.

Current Staff Identification

QUAD A recognizes that significant differences exist in all countries related to the qualifications of surgical clinic staff. QUAD A wants to assure that appropriate requirements are met for accreditation. All physicians working in the surgery facility have completed appropriate medical and surgical training to perform the procedures in their specialty. Where licensure exists, all physicians must be licensed; where specialty certification exists, all physicians must have appropriate certificates. If non-physicians use the facility (such as podiatrists) they must be appropriately trained and must be licensed or certified where possible.

Self-Survey Attestation

As [Director/Administrator] of this facility, I attest that this facility meets all applicable local, state, and federal laws, regulations, rules, and codes (“Applicable Law”), including zoning and construction codes and regulations and Certificate of Need requirements. I further acknowledge that wherever Applicable Law differs from QUAD A Standards, the stricter is applicable, whether it is the Applicable Law or the QUAD A Standard. Wherever Applicable Law conflicts with QUAD A Standards, the Applicable Law supersedes the QUAD A standard. In other words, if the Applicable Law *expressly prohibits* the action the QUAD A standard requires, the Applicable Law will supersede the QUAD A standard.

In compliance with QUAD A’s requirement for a self-survey to be conducted annually between routine onsite surveys conducted by QUAD A Surveyors (Standard 1-B-8), I further attest that our staff has conducted a thorough self-assessment of our facility based on:

- all applicable QUAD A standards according to the program in which we are enrolled using the checklist provided,
- the anesthesia class (as applicable),
- any geographically specific standards, and
- any other standards implementation that applies to our facility.

I also attest that we have compiled a comprehensive “Accreditation File” (including accurately recorded determinations of compliance with each standard, completed plans of corrective action based on our self-assessment, and documented evidence of corrections for any citations) and incorporated our findings and lessons learned into our quality assurance and quality improvement process. We will maintain a copy of the complete Accreditation File for a minimum of 3 years and make the same available to QUAD A surveyors at any onsite surveys.

Furthermore, I authorize QUAD A to release accreditation reports and corrective action plans to the state competent government authority for the jurisdiction(s) in which this facility is located upon request.
